Full-stack Software Engineer experienced in building scalable architecture and high-impact features, such as a full-stack ePrescribe overhaul, an AI-assisted data import tool, and multi-factor authentication. Skilled at bridging the gap between engineering and design by translating complex requirements into component-based interfaces using JavaScript, TypeScript, and Next.js/React, integrating with back-end APIs for production-ready experiences.

Professional Experience

Software Engineer • myhELO • Fishers, IN • June 2024 – Present

- Re-architect the ePrescribing infrastructure by re-writing the full-stack JavaScript and PHP codebase for increased reliability and a streamlined workflow while processing around 4,000 prescription transactions per month.
- Pioneer an intelligent pipeline that leverages a Large Language Model to parse and import from unstructured user data, eliminating hours of manual data entry.
- Engineer a reusable multi-factor authentication component that supports SMS, email, and passkey, empowering a secure login experience, password reset, provider identity verification, and controlled-substance ePrescribing.
- Redesign the site-wide UI template in JavaScript and CSS to prioritize critical patient data, increase layout flexibility, and reduce front-end complexity.
- Build a workflow guiding users through password creation, profile setup, and interactive training that is curated based on role to improve user activation rates and reduce support requests.
- Streamline design-to-development workflows by establishing a Figma design library to ensure front-end consistency, visualized expectations, and efficient development.
- Drive technical growth by conducting interviews, onboarding new engineers, and presenting milestones to executive leadership.

Software Engineering Intern • Allegion • Carmel, IN • May 2023 – Aug 2023

- Developed an intuitive announcements feature within a component-based Angular site by integrating with back-end APIs, allowing administrators to target messages to hundreds of employees.
- Collaborated with Product Owners, Interaction Designers, and Back-end Developers to translate mockups into production-ready interfaces.

Software Engineering Intern • Qualifi • Indianapolis, IN • May 2022 – Aug 2022

- Shipped features and usability improvements by translating high-fidelity mockups into Next.js and TypeScript components.
- Enforced system reliability by implementing unit test cases using React Testing Library.

Leadership & Projects

Front-End Developer • Personal Portfolio ([JonathanMaskew.com](https://www.JonathanMaskew.com)) • Noblesville, IN • August 2025 – Present

- Design a responsive portfolio using TypeScript, Next.js, and Tailwind CSS and deploy via Vercel.
- Engineer an interactive AI assistant to provide real-time responses to visitor inquiries via the Gemini API.

Design Director • Hack the Future • Purdue University, West Lafayette, IN • March 2022 – May 2024

- Led a branding revamp and increased outreach efforts leading to a record-breaking nearly 90% increase in applicants YoY.
- Mentored four project teams on UX/UI principles and created resources to guide translating Figma mockups into front-end code.
- Established branded components in React to streamline development and maintain consistency across all team projects.

Software Developer • Hack the Future • Purdue University, West Lafayette, IN • Sep 2021 – May 2022

- Delivered a testimonial management system to Leadership Lafayette by collaborating with an eight-person agile team.
- Implemented React components by translating the designer's mockups and integrating with a MongoDB database.

Education

Purdue University • West Lafayette, IN • May 2024

- **Degree:** Bachelor of Science in Computer Science, concentration in Software Engineering
- **GPA:** 3.69 out of 4.0; **Dean's List:** 4 semesters (Spring 2022 – Fall 2023); **Semester Honors:** 5 semesters (Fall 2021 – Fall 2023)

Skills

- **Core competencies:** System Architecture, APIs, LLMs/Prompt Engineering, Code Quality & Reviews, Scrum/Agile, Front-end Development, Full-stack Development, End-to-End Testing, CI/CD Pipeline, UX/UI Design, Accessibility, Web Security, Prototyping
- **Languages:** JavaScript, TypeScript, CSS, HTML, PHP, Java, C
- **Frameworks:** Next.js, React, Angular, Tailwind CSS, Node.js
- **Tools:** Git, Error Monitoring, Vercel, Core Web Vitals, Figma
